Ouriosities of Plant-Feeding.

Experiments often tried and carefully plant and of nitrogen, but it must be able o give these up to the plant in due quantiwithout difficulty compound a soil that hould include every element of plant-food in abundance and yet the soil be entirely sterile. The food is there but is locked up, and put them in a condition to be absorbed by the plants. The soil food of plants is lica, sulphuric acid and chlorine. A good soil will contain all these, and if it happens

ortant element, being largely requir-

nitrogen of the air is also assimilated by the soll in the form of ammonia. Nitrogen also passes into the air from the earth in many different ways and then is returned again, the interchange being constant Plants can absorb carbon from the air only during the day, as light is essential to the process; during the night time plants absorb oxygen; hence while they aid in purifying the air by day, they rob it of one of its most important life and health imparting constituents by night; when plants appropriate carbon from the air, they give off carbon; hence while house plants may conduce to health by purifying the air by day, they poison it by night and are therefore injurions. Plants through the larger part of their food. A land "flowing with milk and health im many different ways and then is returned again, the interchange being constant the plants and absorber and they are also be their home after four hundred years of slavery and forty of wandering dyears of slaver the soil in the form of ammonia. Nitro-gen also passes into the air from the earth

that any one of them is wanting, the plant will suffer in all its parts, while if any one of them is in excess, the plant will take up only a given amount, leaving the balance stored up in the soil for future use. Sometimes the food substances so left will form not profitable when carried on entirely by praxy. With the present improved methods of farming the owner is no longer obliged "to hold the plough or drive," be placed beyond the reach of the plant until they are again unlocked by new combinations.

The following brief description of the various kinds of soil-food may be of interest to some. At the head of the list we place phosphoric acid, one of the most important and very abundant in nature, yet the soil in a natural condition exhibits it in extremely small quantities—nothing like equal to the demand. Most of the animal manures furnish it in good quantities, hence in the field with his mean and the form which is the profits were reduced and then the farm it is taken in the field will be came worn out for want of persons are almost invariable weak, and the temperature at which it is taken into the stomach. This is particularly true in cases of nervous prostrations are almost invariable weak, and the temperature at which milk is ingested will determine whether it shall be gratefully received and readily digested, or, on the

While waiting for the train at Yarmouth Yarmouth village and made a short call on Mrs. M. D. Wellcome whose contributions to this and other papers upon flower-culture have been read with so much interest. Her flower garden has suffered somewhat on account of the cold and dry weather, the subject of flowers and the best authority in Maine. Her recently published pamphlet which costs only fifteen cents, should find a place in every family where roses are grown. We were surprised to learn from her that the call for it is small. Mrs Wellcome has a larger work in pressentield "Talks on Flowers" which cubraces a great variety of topics upon the delightful subject of flowers and their cubration which we doubt not will have a close at once to Mrs. Wellcome the requisite fifteen cents and secure a copy of the little work on roses.

We spent the night last week with our old friend Sylvanus Poor Esq., at Andover Corner. He has been a subscriber to this paper for many years and is a progressive farmer. Mr. Poor was born in Andover, his father, Dr. Sylvanus Poor being one of the early settlers. His grandfather, Ebenican Flower and the carry was a sould be carry the large and a half feet to four was born in Andover, his father, Dr. Sylvanus Poor being one of the early settlers. New York Money Market

mailpois. When the train carrying soldiers attempted to cross, the structure gave way and the entire train was precipitated down a steep embankment. Part of the train consisted of freight cars loaded with alcohol. This set fire to the entire mass of wreckage and everything was burned. One hundred and ninety-two privates and thirteen officers are known to have been killed outright of slowly roasted to death. Fifty other persons were either fatally or seriously injured. The bridge was known to be unsafe, but was nevertheless continued in use. The road is narrow guage, was built entirely by Mexican capitalists, and was first opened to the public on the 18th instant. The letest accounts of the disaster on the Morebo Railroad report 17 officers and 197 privates killed, not including railroad officials and employes or women and children of soldiers, many of whom were on the train. Only 60 persons in all were saved alive, and of these 40 were more or less injured. The disaster occurred at 11 o'clock Friday night as the train, which was a long one and drawn by two engines, was passing over a wooden bridge. For a moment after the plunge of the cars from the bridge all was darkness. Suddenly 100 barrels of brandy, loaded on two of the vans, caught fire and the burning fluid inundated the mass of passengers struggling in the ruins, only a few of whom were not disabled or hopelessly wedged in the timbers, escaped. The dead and living were wrapped in a sheet of flames and slowly burned before the eyes of the survivors.

For several months past horse thieves in Biddeford and adjoining towns have succeeded in plying their business and getting away with several valuable teams undiscovered. On Saturday a team valued at \$225 was stolen from Biddeford belonging to wear and succeeded on Sunday in recovering the team and arrested Wilbur Stone as the thief, who implicated several others.

The terrible occurrence which took place in Wiscasset the 24th uit., is still shrouded in Wiscasset the 24th uit., is still shrouded to the strong three parts of the form of the form in the story of the fire is not definitely known. The most of the furniture was a saved.

NEW MODEL BUCKEYE

Twenty-five seasons and still in advance of all other Ma hines in fewness of parts and great simplicity.

Will do all practical work that can be done in the hay field. Carries all weight on the drive wheels, civing all weight of the machine for driving power to the cutter, and does not load and lur the borse-oeck as other machines do, with a heavy dragging frame in front of axle. Does not lift the cutter but in draft, which in other machines makes a higher cut when the team pulls hard. Makes even work plit, down hill and over hummocks, and cradle holes, and in heavy bottoms. Has the double hinge plate, and the heavy bottoms. Has the double hinge joint, giving perfect flexibility to the floating cutter bar. Has but a single lever which lifts only the cutter bar, and this higher than any other machine. In all situations and under all circumstances maintains he level cut. leaving a short even stubble in all parts of the field.

On fifty acres will cut \$25 worth more grass that any other machine, a saving each season greater than the difference in price between the Buckey and other machines. Has less machinery and fewer parts than any other machine, and no extra levers. From its great simplicity can be understooned kept in order by an ordinary farm hand. Has no mystery of genring. The bar folds flat acrostic frame, and the machine can be put entirely out of gear, making it as safe as a farm wagon when on the road or going from field to field. No loose shacking, swivels or superfinons levers constantly liable oget out or order. The Buckeye is always in order and always roady for work, and will stand most sunch qualifies have made the Buckeye the machine can be used. Is of lighter dirart than any other machine matc. These well tested merits and stauch qualifies have made the Buckeye the machine can be used. Is of lighter dirart than any other machine can be used. Is of lighter dirart than any other machine matc. The Doctor's Certificate. READ IT!

WHY WILL YE SUFFER? THE PRICELESS VEGETINE! CANCER CURED.

Washington. D. C., Jan. 6, 1861.

Dr. H. R. STRVENS:—The great sympathy I have for others who are sufferers trom Cancers and Cancerous Humors, impresses me that it is my sacred duty to write to you, although a strategy to see. For two long years I suffered and endured the most painful forments from Cancer of the Breast. My case defield the efforts of the best physicians. I tried many remedies, when a gentleman in the office with my husband advised him to try your priceless Vegetine; he brought home a bottle. Before taking half of the first bottle I slept well nights. I continued taking the Vegetine, gaining every day. I have taken eighteen bottles. I am now entirely cured; not a vestige of my disease left. I wish every one could know what a good medicine it is for such diseases. Your same will never beforesome. May God ever bless, guide and protect you, is the earnest dilly prayer of MSS. E. A. SKIVINGTON.

A Positive Cure for Kidney & Liver Complaints and all Diseases arising therefrom,

oropsy, Gravel, Disbotes, Inflammation of the Bladder, Brick Dust Deposit, Eheumatism, Dyspepsia, Female Complaints, and all Diseases of the Urinary Organs.

I have sold over one thousand bottles of Elixir of ife Root, and have never found a case where it tiled to give satisfaction. WM. H. KITTREDGE. Nearly Dead and One Bottle Cured Him.

WESTFIELD, Mass, March 28, 1881.

J. W. KITTREDGE, Agent Elixir of Life Root:

Duar Sir:—Having suffered intensely for four years with disease of the Kidneys, after having during that time tried various medicines without obtaining relief, I was induced to try a bottle of your ELIXIR OF Life ROOT, and it affords me pleasure to say that one bottle of it completely cured me. I recommend it as the only valuable and certain cure for kidney troubles I have ever seen. I would add that before taking your medicine I had become so weak that I was about to give up work. Hoping that others who have suffered like myself may be so fortunate as to try your valuable medicine, truly yours,

T. F. MCMADS.
